Dear customer,

We are all confronted with new situations due to the appearance of the coronavirus and are faced with the challenge of making hard decisions.

First and most important, of course, is the health of our employees, contract partners, suppliers and customers. Therefore, we introduced all possible preventive, security and hygienic measures to avoid the virus spreading.

This is to notify you that PROFILY s.r.o. continues the manufacture of the most production programmes in respect to all actions released by the Government of the Czech Republic, valid from 16th March 2020.

The measures taken in the Czech Republic as well as in other countries negatively affected the ability to maintain some of the production programmes, particularly due to the interrupted supply of raw materials.

As a result, there appeared changes of some production programmes. We monitor the situation very closely, follow up as the situation develops and we will immediately notify you of possible changes in the delivery of that affected production.

As your business partner we would like to stress that we continue to act proactively to review and adjust this inconvenient situation as much as we possibly can. Further, we at Profily s.r.o. assure you, that the most of production programme is not affected and runs according planned schedule.

If you have any specific requirements or questions, please feel free to contact us.

Thank you for your understanding and collaboration.

Sincerely

Monika Pitrunová

Project Manager
